

Chapter 3

Third step in Research

Footfalls are going to be divided in the following ways:

- Pure process of Research, but in a more concise ways than tha last time
 - Focus on gathering datas;
 - Make your graphics through Google Charts
- 

3.1

Research ...Again!

The idea is:

- To read again the draft you outlined in the previous chapter.
- To look up your Research from last time.
- To do a new one concerning what you think is lacking.

3.2

Gathering data

The process is the same as before:

- Maybe the datas you gathered last time are still relevant, or maybe not, or maybe you just need to gather more information.
 - Be serious on which website you take them, and do not forget to note the reference each time.
 - Think about what statistics or datas would be the most useful to empathize the most as possible with your subject : what kind of evidence you need to highlight this point here, and this point there.
 - Sometimes, datas we're gathering are not very relevant, pertinent : they are just numbers without real meanings, or at least, not very helpful to better understand your idea. The issue will be to figure it out when it is the case, and to opt toward what is efficient.
